PROFESSIONAL OBJECTIVE

I consider myself a person focused on software development, motivated to keep learning and constantly improving both professionally and personally. I enjoy solving problems, taking on new challenges, developing efficient solutions, and acquiring new knowledge and technologies that allow me to strengthen my skills and abilities. I seek to continue growing in the technology field, contributing my knowledge, improving my skills, and participating in projects that represent new challenges and learning opportunities.

EXPERIENCE

Morelia Mich.
May 2024 - Present

Software Developer Caja Morelia Valladolid

- Design and implementation of business logic applying object-oriented programming principles and design patterns.
- Development and optimization of queries, stored procedures, and data management in SQL Server.
- Integration of services and APIs using IBM API Connect and GatewayScript.
- Implementation of error handling, validations, and standardized responses for enterprise services.
- Development of frontend interfaces and components using Vue.js and Angular.
- Experience in system integration and communication using RabbitMQ.
- Use of Vault for the secure management of secrets and configurations.
- Technical documentation of APIs, workflows, and services using tools such as Postman and Confluence.
- Use of Git for version control, collaborative work, and branch management in development projects.

EDUCATION

2018 - 2023

Bachelor's Degree in Computer Science Universidad Michoacana San Nicolás de Hidalgo
